IDENTIFIERS	*Schools and Staffing Survey (NCES); User Guides

ABSTRACT

This volume is the restricted-use codebook for the 1993-94 Schools and Staffing Survey (SASS). It contains the layout and descriptive information for all survey and sampling variables. The volume opens with a discussion of created variables and some user notes. Four appendixes contain the codebook sections for the restricted-use version. These are: (1) "Appendix H: Teacher Demand and Shortage (SASS-1A), Public and Private School (SASS-3A and #-B) Codebook"; (2) "Appendix I: Public and Private School Principal (SASS-2A and 2B) Codebook"; and (3) "Appendix J: Public and Private School Teacher (SASS-4A and 4B) Codebook." (SLD)

Reproductions supplied by EDRS are the best that can be made
from the original document.

The National Center for Education Statistics (NCES) is the primary federal entity for collecting, analyzing, and reporting data related to education in the United States and other nations. It fulfills a congressional mandate to collect, collate, analyze, and report full and complete statistics on the condition of education in the United States; conduct and publish reports and specialized analyses of the meaning and significance of such statistics; assist state and local education agencies in improving their statistical systems; and review and report on education activities in foreign countries.

NCES activities are designed to address high priority education data needs; provide consistent, reliable, complete, and accurate indicators of education status and trends; and report timely, useful, and high quality data to the U.S. Department of Education, the Congress, the states, other education policymakers, practitioners, data users, and the general public.

We strive to make our products available in a variety of formats and in language that is appropriate to a variety of audiences. You, as our customer, are the best judge of our success in communicating information effectively. If you have any comments or suggestions about this or any other NCES product or report, we would like to hear from you. Please direct your comments to:

Preface to Volume II

This set of volumes is intended to document the data collection of the 1993–94 Schools and Staffing Survey (SASS) and is intended for several types of readers. Researchers ready to access the datafile may choose to go directly to the Codebooks for each survey (Volumes II and III for the Restricted-Use Version and the Public-Use Version, respectively), which contain the layout and descriptive information on all survey and sampling variables. The codebooks are also useful as additional reference for the CD-ROM's Electronic Codebook.

Persons wishing to ascertain whether their research needs can be served by SASS data may find the Overview useful with descriptions of the survey's contents and objectives.

Finally, for those interested in the design and methodology of each SASS component, there are chapters on Sample Design and Implementation, Data Collection, Edit Procedures, and Imputation.

We are interested in your reaction to the information presented here about the Schools and Staffing Survey data collection system as well as the microdata files we release. We welcome your recommendations for improving our survey work and data products. If you have suggestions or comments or want more information, please contact:

SASS Data
Education Surveys Program

TABLE OF CONTENTS

VOLUME I

Preface ... iii

Acknowledgments ... iv

I. Overview ... 1
  A. Background ... 3
  B. Purpose and Content of the Survey ... 4
  C. Target Populations and Estimates ... 9
  D. Periodicity of the Survey ... 11

II. Changes in SASS Design and Content from 1991 to 1994 ... 13
  A. Design Changes ... 15
  B. Content Changes ... 15
  C. Procedural Changes ... 19

III. Preparation for the 1993–94 SASS ... 21
  A. Cognitive Research on Public School Questionnaire ... 23
  B. 1991–92 SASS Field Test ... 24
  C. Teacher Listing Validation Study ... 30
  D. 1993 SASS Student Records Field Test ... 31
  E. 1990–91 Library Field Test ... 33

IV. Sample Design and Implementation ... 35
  A. Sampling Frames ... 37
    1. Public Schools ... 37
    2. Bureau of Indian Affairs Schools ... 37
    3. Private Schools ... 37
  B. Sample Allocation ... 39
    1. Public Schools ... 39
    2. Bureau of Indian Affairs Schools ... 40
    3. Private Schools ... 40
  C. Overlapping 1991 and 1994 SASS Samples ... 42
    1. Public Schools ... 42
    2. Private Schools ... 43
  D. Sample Selection Procedures ... 43
    1. Public Schools ... 43
    2. Private Schools ... 44
    3. Public School Districts ... 45
    4. Teachers ... 45

5. Public and BIA School Libraries/Librarians 48
6. Private School Libraries/Librarians 49
7. Students 50

V. Data Collection 53
A. Time Frame of the Survey 55
B. Data Collection Procedures 56

VI. Response Rates 63
A. Survey Response Rates 65
B. Item Response Rates 85

VII. Edit Procedures 117
A. Clerical Edit 119
B. Preliminary ISR Classification 119
C. Computer Pre-edit 119
D. Computer Edit 129
E. Final Interview Status Edit 129
1. Teacher Demand and Shortage Questionnaire for Public School Districts (SASS-1A) 129
2. School Principal Questionnaires (SASS-2A, 2B, and 2C) 130
3. Public School Questionnaire (SASS-3A) 131
4. Private School Questionnaire (SASS-3B) 131
5. Indian School Questionnaire (SASS-3C) 132
6. Teacher Questionnaires (SASS-4A, 4B, and 4C) 133
7. Student Records Questionnaire (SASS-5) 134
8. Library Media Center Questionnaires (LS-1A, 1B, and 1C) 134
9. Library Media Specialist/Librarian Questionnaires (LS-2A, 2B, and 2C) 135

VIII. Imputation Procedures 175
A. Teacher Demand and Shortage Questionnaire for Public School Districts (SASS-1A) 178
1. First Stage Imputation for TDS 178
2. Second Stage Imputation for TDS 179
3. Clerical Imputation for TDS 180
B. School Principal Questionnaires (SASS-2A, SASS-2B, and SASS-2C) 180
1. First Stage Imputation for Principals 180
2. Second Stage Imputation for Principals 180
3. Clerical Imputation for Public and Private School Principals 181
C. Public School Questionnaire (SASS-3A) 181
1. First Stage Imputation for Public Schools 181
2. Second Stage Imputation for Public Schools 183
3. Clerical Imputation for Public Schools 184

D. Private School Questionnaire (SASS-3B) 184
  1. First Stage Imputation for Private Schools 184
  2. Second Stage Imputation for Private Schools 185
  3. Clerical Imputation for Private Schools 186
E. Indian School Questionnaire (SASS-3C) 187
F. Teacher Questionnaires (SASS-4A, SASS-4B, and SASS-4C) 187
  1. First Stage Imputation for Teachers 187
  2. Second Stage Imputation for Teachers 187
  3. Clerical Imputation for Teachers 188
G. Student Records Questionnaire (SASS-5) 188
  1. First Stage Imputation for Students 188
  2. Second Stage Imputation for Students 188
  3. Clerical Imputation for Students 189
H. Library Media Center Questionnaires (LS-1A, LS-1B, LS-1C) 189
  1. First Stage Imputation for Library Media Centers 189
  2. Second Stage Imputation for Library Media Centers 190
  3. Clerical Imputation for Public and Private School Library Media Centers 191
I. Library Media Specialist/Librarian Questionnaires (LS-2A, LS-2B, LS-2C) 191
  1. First Stage Imputation for Librarians 191
  2. Second Stage Imputation for Librarians 192
  3. Clerical Imputation for Public and Private School Librarians 193
J. Imputation Flags 194

IX. Weighting 285
A. School Weight (SASS Questionnaire Forms 3A, 3B, and 3C) 287
B. School Weighting Adjustment Cells 288
  1. Public and BIA School Adjustment Cells 288
  2. Private School Adjustment Cells 289
C. Administrator Weight (SASS Questionnaire Forms 2A, 2B and 2C) 290
D. Teacher Demand and Shortage for Public School Districts (SASS Questionnaire Form 1A) 290
E. LEA Basic Weights 291
  1. LEAs with Schools 291
  2. LEAs Without Schools 292
  3. LEA Basic Weights for Delaware, Nevada and West Virginia 292
F. Teacher Weights (SASS Questionnaire Forms 4A, 4B and 4C) 292
  1. Public and BIA Adjustment Cells 293
  2. Private Adjustment Cells 294
G. School Library Weights (Questionnaire Forms LS-1A, LS-1B and LS-1C) 295
  1. Public and BIA School Library Adjustment Cells 296
  2. Private School Library Adjustment Cells 297

- H. School Librarian Weights (Questionnaire Forms LS-2A, LS-2B and LS-2C) 297
  - 1. Public and BIA School Librarian Adjustment Cells 299

Appendix J. Public and Private School Teacher (SASS-4A and 4B) Codebook J-1

I. Created Variables

I. Created Variables

A. Variables Added to the Datafile

Several analysis variables were added to both restricted-use datafiles and public-use datafiles (unless otherwise noted) for data users' convenience:

1. School control number (SCHCNTL) - Principal, Teacher, and School files

The School control number (SCHCNTL) is on the School file and is added to the Principal and Teacher files. The SCHCNTL is used to link a Principal with their School or Teachers with their School. Note: SCHCNTL is unique on the School and Principal files. However, there will be many teachers in one school with the same SCHCNTL on the Teacher file.

2. School District control number (LEACNTL) - Principal, Teacher, and School files

The School District control number (LEACNTL) is on the School District file and is added to the Public School, Principal, and Teacher files. The LEACNTL is used to link Public Schools, Principals, and Teachers with their School District. Note: LEACNTL is unique on the District file. However, there will be many schools, principals, and teachers in one school district with the same LEACNTL.

3. School level (SCHLEVEL) - Principal, Teacher, and School files

School level is defined as elementary, secondary, or combined, where a combined school has some elementary and also some secondary grades. The following definition of school level was used to determine a consistent school level, and replaces the self-assigned school level:

1. Elementary if the school has only grades below 8th grade;
2. Secondary if the school has grades between 7th and 12th;
3. Combined if the school has any other combination of grades.

Two examples of a combined school level are 4–8 and 5–12. Secondary schools can have any combination of grades between 7th and 12th grade.

4. Type of private school (TYPOLOGY) - Principal, Teacher, and School files

There is a wide diversity among private schools, between types of religiously-oriented schools, Non-sectarian and special-purpose schools. NCES has adopted a nine-level grouping of private schools that reflects this diversity.[1]

1. Catholic, Parochial;
2. Catholic, Diocesan;
3. Catholic, Private order;
4. Other religious, Conservative Christian;
5. Other religious, denomination-affiliated;
6. Other religious, unaffiliated;
7. Non-sectarian, regular program;
8. Non-sectarian, special emphasis program;
9. Non-sectarian, special education program.

5. 3-Level Affiliation (AFFIL) - Private Principal, Teacher, and School files

The nine Typology levels are also consolidated into the three major affiliation categories traditionally reported by NCES: Catholic, other Religious, and Non-sectarian. Typology levels 1–3 are the Catholic affiliations, 4–6 are Other religious affiliations, and 7–9 are Non-sectarian affiliations.

1. Catholic;
2. Other religious;
3. Non-sectarian.

6. Community type (LOCALE) - Principal, Teacher, and School files

The community type in which the school operates is based upon the Census definition of community size and its relation to urbanized or rural places.[2] SASS collected a self-reported variable, but it was subject to misclassification, because respondents tended to report the size of the immediate area without regard to its urban, suburban, or rural status. The self-reported community type has been replaced by one determined from the ZIP code of the school, and matched to the Census community size for that ZIP code. For the 1990–91 and 1993–94 SASS, LOCALE is derived for the public schools by matching to the LOCALE code on the Common Core of Data School file, and is derived for the private schools by copying the algorithm from CCD and applying it to the ZIP codes of private schools.

---

[1] McMillen, M. and Benson, P. (1991), *Diversity of Private Schools*, National Center for Education Statistics, Office of Educational Research and Improvement, U.S. Department of Education, Washington, DC, Technical Report, NCES 92-082.

[2] Johnson, F. (1989), *Assigning Type of Locale Codes to the 1987-88 CCD Public School Universe*, National Center for Education Statistics Technical Report, Data Series: SP-CCD-87188-7.4, CS 89-194.

1. Large city - central city of a standardized metropolitan area having a population greater than or equal to 400,000 or a population density greater than or equal to 6,000 people per square mile.

2. Mid-size city - central city of a standardized metropolitan area having a population less than 400,000 and a population density less than 6,000 people per square mile.

3. Urban fringe of large city - place within a metropolitan area of a large city and defined as urban by Census (i.e., within same county).

4. Urban fringe of mid-size city - place within a metropolitan area of a mid-size city and defined as urban.

5. Large town - a town not inside a metropolitan area, with a population greater than or equal to 25,000.

6. Small town - a town not within a metropolitan area and with a population less than 25,000 but greater than 2,500.

7. Rural - a place with fewer than 2,500 people or a place designated as rural by Census.

7. School's Urbanicity (URBANIC) - Principal, Teacher, and School files

This variable is a recoding of LOCALE:

1. Central city;
2. Urban fringe or Large town;
3. Rural/Small town.

The 7 LOCALE levels are consolidated into 3 major Urbanicity categories reported by NCES: Central City, Urban Fringe, and Rural. LOCALE levels 1 and 2 are central city, 3–5 are urban fringe, and 6 and 7 are rural designations. This categorization conforms to Bureau of Census' geographic definitions of urbanicity (and OMB's list of Metropolitan Statistical Areas).

8. State abbreviation (STATABB) - Principal, Teacher, and School files

This is the abbreviation of the state in which a school is physically located. This may not be the same as the abbreviation in the mailing address.

9. Size of School District (LEASIZE) - Public Principal, Teacher, and School files

This is computed by doing a sum of the number of students in the School District (LEA). The number is then categorized:

1 = None
2 = 1 - 999
3 = 1,000 - 9,999
4 = 10,000 - 990,000

10. Number of minority teachers (NMINTCH) - Principal, Teacher, and School files

This variable is computed from the SASS teacher race/ethnicity counts. The sum of teachers of all racial/ethnic groups other than White is calculated.

11. Percent minority teachers (PMINTCH) - Principal, Teacher, and School files

This variable is computed from the SASS teacher race/ethnicity counts. The sum of teachers of all racial/ethnic groups other than White is calculated as a percentage of teachers of all race/ethnicity groups.

12. Number of minority enrollment (NMINENR) - Principal, Teacher, and School files

This variable is computed from the SASS student race/ethnicity counts. The sum of students of all racial/ethnic groups other than White is calculated.

13. Percent minority enrollment(PMINENR) - *Restricted-Use files* (Principal, Teacher, and School)

This variable is computed from the SASS student race/ethnicity counts. The sum of students of all racial/ethnic groups other than White is calculated as a percentage of students of all race/ethnicity groups.

14. BIA flag (BIA) - Principal and School files

This variable indicates whether a school is a Bureau of Indian Affairs (BIA) school. The Principal at a BIA school is also flagged as BIA.

15. School enrollment (ENRK12UG) - *Restricted-Use files* (Principal and Teacher)

This is variable S0255 on the School file and was placed on the School Principal and Teachers' records.

16. Race-ethnicity (RACE_ETH) - Principal and Teacher files

This variable was created by using questions 28a and 29 on the Principal Questionnaire and questions 57a and 58 on the Teacher Questionnaire.

17. Age (AGE) - *Restricted-Use files* (Principal and Teacher)

This variable was created by using question 30 on the Principal Questionnaire and question 59 on the Teacher Questionnaire and subtracting the 'Year of Birth' from 1994.

18. Highest degree earned (HIDEG) - Principal and Teacher files

The highest degree earned is a recoding of the various academic degrees received variables into:

0. No degree;
1. Less than or equal to a Bachelor's degree;
2. Master's degree;
3. Above a Master's degree.

19. School's program type (PGMTYPE) - Principal and Teacher files

This is the type of the Principal or Teachers' School.

1. Regular elementary or secondary;
2. Montessori (Private only);
3. Elementary or secondary with a Special Program Emphasis;
4. Special Education - primarily serves students with disabilities;

5. Vocational/Technical;
6. Alternative - offers a curriculum designed to provide alternative or nontraditional education.

20. School's tuition (TUITIN) - Private Principal and Teacher files

This is the highest ANNUAL tuition charged by the Principal or Teachers' School for a full-time student. This variable was created using question 19c from the Private School Questionnaire.

21. Continuing FTE Teachers (CONFTE) - District and Private School files

This variable is created by subtracting the Newly Hired FTE Teachers from the Total FTE Teachers. This reflects the number of teachers who stayed in the teaching profession at the Public School District or Private School being questioned.

22. Teaching experience (TCHEXPER) - Principal file only

This variable is created by adding number of years experience as a teacher before becoming a Principal and number of years experience as a teacher after becoming a Principal. This variable was created using question 11a and 11b on the Principal Questionnaire.

23. Principal experience (PRNEXPER) - Principal file only

This variable is created by adding experience as a principal at this school and experience as a principal in another school.

24. Teaching experience (TOTEXPER) - Teacher file only

This variable is created by adding a teacher's years of experience as a full-time and/or part-time teacher for both Public and Private schools.

25. Teaching Level (LEVEL) - Teacher file only

The Elementary/Secondary algorithm was developed for the 1990–91 SASS Teacher file to assist in assigning the grade LEVEL which the teacher was teaching. During analysis, a misassignment of the teachers' level was found using the 1990–91 algorithm. At the end of the algorithm, if a teacher had not met one of the conditions, the teacher was assigned 'LEVEL=2'. This caused many elementary school teachers to be assigned as secondary. This find initiated the rethinking of the algorithm and expanding the code prior to the 1993–94 SASS. When this "NEW" algorithm was applied to the 1990–91 data, the 11,888 public school teachers and 1,671 private school teachers were properly assigned a LEVEL that correctly reflected their teaching assignment.

The "NEW" algorithm assigns LEVEL as follows:

1. *Elementary* - An elementary teacher was one who, when asked for grades taught, checked:

   - Only "ungraded" and was designated as an elementary teacher on the list of teachers provided by the school; or
   - 6th grade or lower, or "ungraded" and no 10th through 12th grade; or
   - 7th and 8th grades only, and reported a primary assignment of special education and was designated as an elementary teacher on the list of teachers provided by the school.

   If teacher teaches some classes at both levels:

   - 6th grade or lower and 7th grade or higher, and reported a primary assignment of prekindergarten, kindergarten, or general elementary; or
   - Departmentalized classes and majority of classes are elementary; or
   - Elementary Enrichment teacher; or
   - Teaches grades 1 through 6 and was designated as an elementary teacher on the list of teachers provided by the school.
   - Teaches more grades 1 through 6 than grades 7 through 12; or
   - Teaches equal number of grades 1 through 6 as grades 7 through 12 and was designated as an elementary teacher on the list of teachers provided by the school.

   If teacher meets none of the above criteria:

   - Elementary Enrichment teacher; or
   - Main assignment is kindergarten or general elementary; or
   - Self-contained class and teaches Special Education; or

2. *Secondary* - A secondary teacher was one who, when asked for grades taught, checked:

- "Ungraded" and was designated as a secondary teacher on the list of teachers provided by the school; or
- 6th grade or lower and 7th grade or higher, and reported a primary assignment other than prekindergarten, kindergarten, or general elementary; or
- 9th grade or higher, or 9th grade or higher and "ungraded"; or
- 9th grade or higher, and no "ungraded", or prekindergarten through 5th grade; or
- 7th and 8th grades only, and reported a primary assignment other than prekindergarten, kindergarten, general elementary, or special education; or
- 7th and 8th grades only, and reported a primary assignment of special education and was designated as a secondary teacher on the list of teachers provided by the school; or
- 6th grade or lower and 7th grade or higher, or 7th and 8th grades only, and was not categorized above as either elementary or secondary.

If teacher teaches some classes at both levels:

- 5th through 9th grade and no "ungraded" or 1st through 4th grade; or
- Has all 7th through 12th grade classes; or
- Has more 7th through 12th grade classes than 1st through 6th grade classes; or
- Has equal classes 1st through 6th grade and 7th through 12th grade classes, and was designated as a secondary teacher on the list of teachers provided by the school.

26. Urbanicity Codes for School Districts - Restricted-use file only (TDS)

As LOCALE codes have not been developed for districts, several other geographic identifiers are included on the restricted-use file only for research purposes. These identifiers are:

a. **State and County FIPS code (STCNTY)** - The standardized FIPS code for a county, combined with the FIPS code for the State. This five-digit code can be looked up in the FIPS publication cited in the User's Notes (see Section XVI).

b. **MSA code (CMSA)** - This four-digit code identifies the specific metropolitan statistical area as defined by OMB and can also be looked up in another FIPS guide. MSAs are areas with at least 50,000 people or with more than one city with population totaling at least 50,000. There is no code for non-MSA districts.

c. **Metropolitan status code (METRO)** - This is a categorical variable, assigned to every district relative to its metropolitan status:

1. Urban area, primarily inside central city;
2. Urban area, primarily outside central city;
3. Non-urban area.

This variable is on the Common Core of Data file and assigned by NCES.

B. Analysis Variables Used in NCES Publications

1. School size - Public-use School file

This variable is a categorization of the total enrollment for a school:

1. 1 - 149 students;
2. 150 - 499 students;
3. 500 - 749 students;
4. 750 students or greater.

2. New Teacher or Experienced Teacher (TNEWID) - Restricted-use Teacher file

"New" teachers are defined as having taught for 3 years or less, either in the public or private schools. This variable is defined prior to obtaining the teacher data, by the school's principal. It can be found among the sampling variables towards the end of the Teacher file codebook.

II. User Notes

II. User Notes

Subsetting a File

Each component within SASS is a distinct record on the datafile: districts, public principals, private principals, public schools, private schools, public teachers, and private teachers. The codebooks for each component cover both the public and private records; in addition, on the restricted-use school file and to a lesser extent, on the public-use file, the district records are combined with the school records. In order to do an analysis on any one component without extraneous "noise" from other components, the programmer or researcher has to subset the file by the variable SURVEY. For example, using the Statistical Analysis System (SAS) language, the following commands would be necessary in the DATA step to retain data for public teachers only:

```
* PC-SAS version *
INFILE 'c:\mydata\tchpgm.sas;        * read in stored output file from CD-ROM;
DATA TEACHERS;                       * start of analysis program;
   IF SURVEY=4;                      * keeps only public school teachers;
```

Using the SASS:1993–94 CD-ROM

The 1993–94 SASS data are being distributed primarily on CD-ROM. 9-Track IBM tapes may be ordered on an as needed basis. The SASS CD-ROM has an Electronic Codebook which enables the user to look up variables and obtain descriptions and simple unweighted frequency counts for all variables. **The SASS:1993–94 Electronic Codebook and Public-Use Data** (or its restricted-use version) **is DOS-viewable but is not designed for viewing in Windows.** It is best to load in the data and use the CD-ROM outside of the Windows environment altogether, as Windows requires a certain amount of memory even when it runs in the background. There may also be conflicts in memory management when attempting to view the SASS CD-ROM within Windows. A Windows version of the SASS data will be available in a future SASS CD-ROM product, a compendium of all of the SASS and TFS data collections.

Detailed "Help" files are available on the CD-ROM as text files. These may be viewed onscreen or printed out for reference. There is information about the use of the Menu functions within the Electronic Codebook (ECB), and examples of how to subset the data and output a datafile for analysis. Troubleshooting tips for installing the programs and data onto your PC's hard drive are also included in text files. **One of the most basic tips to remember is: always have the SASS CD-ROM in its drive, because even analysis output files will refer back to the data stored on the CD-ROM.** Your program will not work if the necessary data aren't available!

How to Get Names of Colleges and Universities from the IPEDS College Codes

In the 1993–94 Schools and Staffing Survey, principals and teachers were asked to provide the name of their undergraduate college or university. Those college and university names (reported in the Principal Questionnaire in item 6a, variable A095 or Teacher Questionnaire in item 15a, variable T0175) were clerically transcribed to the numbering scheme that is used in the Integrated Postsecondary Education Data System,[3] which maintains a directory of colleges and universities. The IPEDS college codes are one of the first variables on any IPEDS dataset; the college codes are the UNITIDs (unit identification codes).

The IPEDS Directory (printed version) of 2- and 4-year colleges and universities is out of print for 1993–94; however, the directory for 1994–95 is now available. Another means of obtaining the college codes is by downloading any of the IPEDS datasets (Institutional Characteristics, or IC, is recommended) from the Internet, and stripping off the first 56 characters only. The UNITID (first 6 characters) is the unique college code, and the remaining 50 characters are for the name of the college or university (names are left-justified and fill up only as many characters as needed).

To download the Institutional Characteristics file: (Internet users)

Gopher users access the Office of Educational Research and Improvement's gopher server (OERI gopher) at the following address:

gopher://gopher.ed.gov

(Among All the Gophers in the World, the OERI Gopher is listed under District of Columbia gophers; or use your local server's URL dialog box to type in the address.)

To navigate through the OERI gopher's menu:

From the first menu, select 7 - Educational Research, Improvement, and Statistics.(OERI & NCES).
From the next menu, select 3 - National Center for Education Statistics.
From the next menu, select 5 - NCES Data.
From the next menu, select 2 - Postsecondary Education data.
From the next menu, select 3 - Integrated Postsecondary Education Data System (IPEDS).
From the next menu, select Institutional Characteristics 1993–94.
Note that the IC datafile is a zipped, binary file. Read the "About .." file before downloading.

Download the entire, zipped IC file to your hard drive. (Be sure to check that you have sufficient space for the entire unzipped dataset before downloading. Even though most of the datafile will be eliminated, you must have the capability to store the entire datafile temporarily.)

---

[3] Broyles, S. and Fernandez, R. (1995), *Directory of Postsecondary Institutions: Volume I: 2- & 4-year Institutions*, U.S. Department of Education, Washington, DC (NCES 96-033-I).

Use the PKUNZIP.EXE utility to expand the zipped file back to its original size. (If you do not have the program PKUNZIP.EXE, that is also available from the OERI Gopher.) Note that there are layout files as well as data files.).

World Wide Web users (Mosaic, Netscape, etc.) access the NCES Home Page:

http://www.ed.gov/NCES

and follow the menu to NCES databases; then proceed as per the gopher instructions to choose the Institutional Characteristics 1993–94 file and download it.

Code for Accessing IPEDS 'Institutional Characteristics' (IC) Data File

Statistical Analysis System (SAS)/PC code:

```
DATA IPEDS;
   INFILE 'C:\IPEDS\IC93.DAT' LRECL=56 PAD MISSOVER;
   INPUT @1 UNITID $6.
      @7 INSTNM $50.;
RUN;
```

SPSS (Statistical Package for the Social Sciences)/PC code:

```
DATA  LIST FILE = 'C:\IPEDS\IC93.DAT'   /
        UNITID 1-6
        INSTNM 7-56
   SAVE  OUTFILE = 'C:\IPEDS\IC93' / COMPRESSED.
```

These programs will strip off the first 56 characters; that will be all that is retained for analysis. The file can then be printed out or imported into a database program and searched for particular codes or names.

A Caution about Merging Files

When merging SASS 1993–94 files, such as school and teacher, the researcher must realize that the individual files do not contain the same number of cases. There is one principal selected for every school in sample, and there are multiple teachers selected for every school in sample (generally a minimum of 3, but the exact number depends upon the size of the school). Differences in response rates for each component result in unequal sample (unweighted) cases between the two files. This is most easily confirmed by checking the unweighted frequencies that are listed in the codebooks for each component. Individual principals, schools, and teachers may have declined to participate in SASS, or there may be respondent teachers in a school that refused to participate. Thus, when merging two SASS files together, such as the teacher and school, disproportionality may occur when clusters of teachers who work at schools that did not complete school questionnaires are eliminated from further analysis because of missing school data. The same may be said about the principal and school files, as the principal questionnaire had a higher response rate than the school questionnaire. Restricted file users should also note that there are public schools with no corresponding district (LEA) record. These districts refused to participate.

FIPS codes

FIPS stands for **Federal Information Processing Standards**. FIPS publications are produced by the U.S. Department of Commerce's National Institute of Standards and Technology (NIST). These codes standardize numeric codes for geographic areas. The detailed names of counties and corresponding codes are published in FIPS Publication 6-4, "Counties and Equivalent Entities of the United States, Its Possessions, and Associated Areas," while the names and codes for the Metropolitan Statistical Areas are included in FIPS Publication 8-5, "Metropolitan Statistical Areas (including CMSAs, PMSAs, and NECMAs)." Copies of FIPS Publications 6-4 and 8-5 are available for sale by the National Technical Information Service (NTIS), U.S. Department of Commerce, Springfield, VA. Write or call the NTIS Computer Products Office at (703) 487-4650 for cost and ordering information. When ordering, refer to Federal Information Processing Standards Publication 6-4 (FIPSPUB6-4) or Federal Information Processing Standards Publication 8-5 (FIPSPUB8-5) and its title.

Calculation of Average Years of Teaching Experience

Items 9 and 10 on the Teacher Questionnaire ask about the years of full- and part-time teaching experience that the teacher has in both public and private schools. Public school teachers are skipped out of the questions on private school experience if they've never taught in private schools; similarly, private school teachers are skipped out of the questions about public school teaching experience if they've never taught in public schools. As a result of this skip pattern, public school teachers who have never taught in private schools will have a value of "missing" on the file for the variables FTPVT and PTPVT; private school teachers who have never taught in public schools will have a value of "missing" on the file for the variables FTPUB and PTPUB.

To calculate the average number of years that all public school teachers have taught in private schools, or the average number of years that all private school teachers have taught in public schools, you should recode these missing values to zeros. Otherwise, the average that you calculate will reflect the average number of years that public school teachers have taught in private schools only for those public school teachers who have ever taught in private schools, or the average number of years that private school teachers have taught in public schools only for those private school teachers who have ever taught in public schools.

This recoding will not be necessary if you are interested in the total years of teaching experience in both sectors because the missing values will be treated as zeros in the sum (FTPUB + FTPVT) or (PTPUB + PTPVT) or (FTPUB + PTPUB + FTPVT + PTPVT).

Created Variables

Chapter XV has complete definitions for variables that are derived from the questionnaire variables. These created variables are on the file to aid in analysis of the data.

Merging SASS With CCD and PSS Data

The SASS data can be merged with the CCD (public) and PSS (private) universe files. To merge with CCD, use the CCDIDSCH variable on the SASS Public School file and the NCESSCH variable on the CCD file. To merge with PSS, use APIN on both the SASS Private School file and the PSS file.

APPENDIX H. TEACHER DEMAND AND SHORTAGE (SASS 1A), PUBLIC AND PRIVATE SCHOOL (SASS 3A AND 3B) CODEBOOK

This codebook represents the School and Staffing Survey Teacher Demand and Shortage and the School Questionnaires for school districts and both public and private schools. In this codebook, data represented by "--" means "not applicable" to the question for the district, public or private survey.

			Unweighted Frequencies		
Variable Name	Description		District	School Public	School Private
SURVEY	Survey form number				
	1 = Teacher Demand and Shortage Questionnaire for Public School Districts..		4993	--	--
	3 = Public school		--	8767	--
	7 = Private school		--	--	2585
CNTLNUM	1994 School Control Number (Public and Private)				
	Char 1-2	FIPS State Code (see Region or State)			
	Char 3	School ID			
		1 = Public Schools	--	8755	0
		3 = Bureau of Indian Affairs Schools (BIA)	--	12	0
		4 = Catholic Schools	--	0	806
		5 = OTHER Private Schools	--	0	1688
		6 = Area Search Frame Schools	--	0	91
	Char 4	Split Indicator			
		0 = School is the original school or is not split	--	8734	2570
		1 = School is the product of a two way or a three way split.	--	28	8
		2 = School is the product of a three way split	--	0	2
		9 = School is part of a merger	--	5	5
	Char 5-7	LEA Number Census assigned, simple sequential assignment for Public. For Private schools it is identical to School Number.			
	Char 8-10	School Number Assigned within LEA for public schools Assigned within State for private schools Range for Overlap Schools 001-499 Range for Non Overlap Schools 501-999			
	Char 11	Questionnaire Identifier 3 = Public School questionnaire 7 = Private School questionnaire			
	Char 12	Check Digit			

Variable Name	Description		Unweighted Frequencies District	School Public	School Private
CNTLNUM	1994 District Control Number				
	Char 1-2	FIPS State Code (see Region or State)			
	Char 3	Type of District			
		1 = Public Schools	4983	--	--
		3 = Bureau of Indian Affairs Schools (BIA)	4	--	--
		7 = LEA with no schools	4	--	--
		8 = LEA that governs both regular and BIA schools	2	--	--
	Char 4	ALL = 0			
	Char 5-7	LEA Number			
	Char 8	Check Digit			
LEACNTL	LEA control number used for merging purposes. Use this variable when merging LEA with the PUBLIC School, Administrator, and/or Teacher files.		4993	--	--

For example if you wanted to merge the LEA data with the Public Admin data.

In SAS: add this line of code after the 'DATA' steps:

```
Data MERGED,
Merge 'ADMIN' (in=A) 'LEA';
If A;
By LEACNTL;
Run;
```

In SPSS, add these lines of code after the 'DATA LIST' steps:

```
DOS: Join match files /file='ADMIN' (Use if in SPSS-DOS)
                      /file='LEA'
                      /by LEACNTL.
WINDOWS: Match files /file='ADMIN' (Use if in SPSS-WINDOWS)
                      /file='LEA'
                      /by LEACNTL
```

Variable Name	Description	Unweighted Frequencies District	 School Public	 School Private
SCHCNTL	School control number used for merging purposes. Use this variable when merging SCHOOL with Administrator and/or Teacher files.	--	8767	2585

For example, if you wanted to merge the SCHOOL data with the ADMIN data.
In SAS, add this line of code after the 'DATA' steps:

```
Data MERGED;
Merge 'ADMIN' (in=A) 'SCHOOL';
If A;
By SCHCNTL;
Run;
```

In SPSS, add these lines of code after the 'DATA LIST' steps:

```
DOS:  Join match files /file='ADMIN'    (Use if in SPSS-DOS)
           /file='SCHOOL'
           /by SCHCNTL.
WINDOWS:  Match files /file='ADMIN' (Use if in SPSS-WINDOWS)
           /file='SCHOOL'
           /by SCHCNTL.
```

Variable Name	Description	Unweighted Frequencies District	 School Public	 School Private
CMSA	Consolidated Metropolitan Statistical Area (CMSA) code: Area of greater than 1 million population that is the totality of the PMSAs in a single area.	4993	--	--
	Primary Metropolitan Statistical Area (PMSA): A PMSA is a metropolitan statistical area that is a component of a consolidated metropolitan statistical area (see MSA). Several adjacent PMSAs comprise a single CMSA.			
	Metropolitan Statistical Area (MSA) code: Area may be an MSA if it is in the MSA in the immediate area and it has a city of at least 50,000 population, or it is an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000.			
METRO	Metropolitan Status Code. NCES classification of the district's service area relative to a Metropolitan Statistical Area (MSA). The Office of Management and Budget defines MSA as an area with: (1) a city of at least 50,000 population, (FIPS PUB 8-5, October 1984) or (2) it includes an urbanized area of at least 50,000 population with a total metropolitan population of at least 100,000 (75,000 in New England). A metropolitan statistical area may contain more than one city of 50,000 and may cross State lines.			
	1 = Primarily serves central city of MSA	385	--	--
	2 = Serves MSA not primarily central city	1893	--	--
	3 = Does not serve MSA	2715	--	--
LOCALE	Type of Locale code. (Public and Private Schools)			
	1 = Large Central City - Central City of Standard Metropolitan Statistical Area (SMSA) with population greater than or equal to 400,000 or a population density greater than or equal to 6,000 persons per square mile	--	698	560
	2 = Mid-size central city - Central city of SMSA but not designated Large Central City	--	1263	508
	3 = Urban fringe of large city - Place within an SMSA of Large Central City and defined as urban by U.S. Bureau of Census	--	962	602
	4 = Urban fringe of mid-size city - Place within an SMSA of Mid-size Central City and defined as urban by U.S. Bureau of Census	--	856	313
	5 = Large town - Place not within an SMSA, but with population greater than or equal to 25,000 and defined as urban by U.S. Bureau of Census	--	280	53

Variable Name	Description	Unweighted Frequencies District	 School Public	 School Private
	6 = Small town - Place not within an SMSA, with population less than 25,000 but greater than or equal to 2,500 and defined as urban by U.S. Bureau of Census	--	2139	370
	7 = Rural - Place with population less than 2,500 and defined as rural by U.S. Bureau of Census	--	2569	179
URBANIC	Recoded Locale.			
	1 = Large or mid-size central city	--	1961	1068
	2 = Urban fringe of large / mid-size city, large town	--	2098	968
	3 = Small town/rural	--	4708	549

STATABB	Two character State abbreviation			

NOTE: The majority of the SASS ECB variables are numeric.
STATABB is alphanumeric and requires a small change to the generated SAS and SPSS code to output correctly.

SAS code changes required:
A dollar sign is required on the INPUT statement for alphanumeric variables.
Example - INPUT STATABB $ 637-638;

In SPSS code:
The letter A in parentheses is required on the DATA LIST statement for alphanumeric variables. Examples below.

In DOS: DATA LIST FILE='DISTRICT' /STATABB 637-638(A).
In WINDOWS: DATA LIST='DISTRICT' /STATABB 637-638(An).

APPENDIX I. PUBLIC AND PRIVATE SCHOOL PRINCIPAL (SASS 2A AND 2B) CODEBOOK

This codebook represents the School and Staffing Survey Principal Questionnaire for both public and private principals. In this codebook, data represented by "--" means "not applicable" for a particular variable to one of the surveys, either the Public Principal questionnaire or the Private Principal questionnaire.

Source Code or Variable Name	Description	Unweighted Frequencies Public	Private
SURVEY	Survey identifier		
	2 = Public school principal	9098	–
	6 = Private school principal	–	2743
CNTLNUM	1994 Principal Control Number (Public and Private)		
	Char 1-2 FIPS State Code		
	Char 3 School ID		
	1 = Public Schools	9085	0
	3 = Bureau of Indian Affairs Schools (BIA) BIA administrators are on a separate Indian School file	13	0
	4 = Catholic Schools	0	840
	5 = OTHER Private Schools	0	1808
	6 = Area Search Frame Schools	0	95
	7 = LEA with no schools	0	0
	8 = School split (extra record)	0	0
	9 = School split into 3 (second extra record)	0	0
	Char 4-6 LEA Number Census assigned, simple sequential assignment for Public. For Private schools it is identical to School Number.		
	Char 7-9 School Number Assigned within LEA for public schools Assigned within State for private schools Range for Overlap Schools 001-499 Range for Non Overlap Schools 501-999		
	Char 10 Questionnaire Identifier 2 = Public (2A) Principal questionnaire 6 = Private (2B) Principal questionnaire		
	Char 11 Check Digit		

Source Code or Variable Name	Description	Unweighted Frequencies Public	Unweighted Frequencies Private
LEACNTL	LEA control number used for merging purposes. Use this variable when merging LEA with the PUBLIC School, Principal, and/or Teacher files.	9098	--

For example if you wanted to merge the LEA data with the Public Admin data, In SAS, add this line of code after the 'DATA' steps:

```
Data MERGED;
Merge 'ADMIN' (in=A) 'LEA';
If A;
By LEACNTL;
Run;
```

In SPSS, add these lines of code after the 'DATA LIST' steps:

```
DOS: Join match files /file='ADMIN'   (Use if in SPSS-DOS)
          /file='LEA'
          /by LEACNTL.
WINDOWS: Match files /file='ADMIN'       (Use if in SPSS-WINDOWS)
          /file='LEA'
          /by LEACNTL.
```

Source Code or Variable Name	Description	Unweighted Frequencies Public	Unweighted Frequencies Private
SCHCNTL	School control number used for merging purposes. Use this variable when merging SCHOOL with Principal and/or Teacher files.	9098	2743

For example, if you wanted to merge the School data with the Admin data, In SAS, add this line of code after the 'DATA' steps:

```
Data MERGED;
Merge 'ADMIN' (in=A) 'SCHOOL';
If A;
By SCHCNTL;
Run;
```

In SPSS, add these lines of code after the 'DATA LIST' steps:

```
DOS:  Join match files /file='ADMIN'   (Use if in SPSS-DOS)
          /file='SCHOOL'
          /by SCHCNTL.
WINDOWS:  Match files /file='ADMIN'   (Use if in SPSS-WINDOWS)
          /file='SCHOOL'
          /by SCHCNTL.
```

QUESTIONNAIRE IDENTIFICATION

Source Code or Variable Name	Description	Unweighted Frequencies Public	Private
STATE	FIPS State Code for the physical location of the Principals' school. FIPS stands for Federal Information Processing Standards and refers to a variety of codes for standardized reference. FIPS county and state codes are codes developed by the National Institute for Standards and Technology (NIST) as numeric identifiers for each county and State in the United States; state codes are listed in the codebooks, while the county codes may be looked up in NIST publications. (FIPS PUB 6-4, August 1991, NTIS). Copies of FIPS publications are available for sale by the National Technical Information Service (NTIS), U.S. Department of Commerce, Springfield, VA. Source Code or Variable Name	Description	Unweighted Frequencies Public	Unweighted Frequencies Private
LOCALE	Type of Locale code (Public and private)		
	1 = Large central city - Central city of standard Metropolitan Statistical Area (SMSA) with population greater than or equal to 400,000 or a population density greater than or equal to 6,000 persons per square mile	720	622
	2 = Mid-size central city - Central city of SMSA but not designated Large Central City	1340	528
	3 = Urban fringe of large city - Place within an SMSA of Large Central City and defined as urban by U.S. Bureau of Census	1028	657
	4 = Urban fringe of mid-size city - Place within an SMSA of Mid-size Central City and defined as urban by U.S. Bureau of Census	891	326
	5 = Large town - Place not within an SMSA, but with population greater than or equal to 25,000 and defined as urban by U.S. Bureau of Census	294	58
	6 = Small town - Place not within an SMSA, with population less than 25,000 but greater than or equal to 2,500 and defined as urban by U.S. Bureau of Census	2218	374
	7 = Rural - Place with population less than 2,500 and defined as rural by U.S. Bureau of Census	2607	178
URBANIC	Recoded Locale.		
	1 = Large or mid-size central city	2060	1150
	2 = Urban fringe of large / mid-size city, large town	2213	1041
	3 = Small town/rural	4835	552
AFFIL	3-Level religious affiliation code		
	1 = Catholic	–	852
	2 = Other religious	–	1236
	3 = Non-sectarian	–	655
TYPOLOGY	Private school typology		
	1 = Catholic – Parochial	–	427
	2 = Catholic – Diocesan	–	271
	3 = Catholic – Private	–	154
	4 = Other religious – Conservative Christian	–	274
	5 = Other religious – Affiliated	–	631
	6 = Other religious – Unaffiliated	–	331
	7 = Non-sectarian – Regular	–	321
	8 = Non-sectarian – Special emphasis	–	160
	9 = Non-sectarian – Special education	–	174

Source Code or Variable Name	Description	Unweighted Frequencies Public	 Private
ADMWGT	Final weight for each sample principal. This weight is the inverse of the probability of selection adjusted for nonresponse, differences between the sample estimate and known universe totals, and for special circumstances arising in the field during data collection. In SAS, this weight is used in a frequency: Weight ADMWGT; In SPSS, this weight is used in a frequency: Weight by ADMWGT.		
	Minimum Value	0.75	0.71
	Maximum Value	106.82	159.61
	Mean	8.7512	9.1197
	Standard Deviation	9.3738	11.6795
REPWGT1- REPWGT48	Replicate weight for bootstrap variance estimation. These weights may be input into variance estimation software which uses the balanced repeated replication method. Rounded to 4 significant decimal places. Maximum number of digits is 8, including the decimal point.	9098	2743

	26. We are interested in the importance you place on various educational goals. From the following eight goals, which do you consider the most important, the second most important, and the third most important?		
A875	Most important		
	1 = Building literature skills (reading, math, writing, speaking)	4154	440
	2 = Encouraging academic excellence	2647	675
	3 = Promoting occupational/vocational skills	171	6
	4 = Promoting good work habits and self-discipline	775	114
	5 = Promoting personal growth (self-esteem, self-knowledge, etc.)	1005	284
	6 = Promoting human relations skills	207	40
	7 = Promoting specific moral values	94	153
	8 = Promoting multicultural awareness or understanding	45	1031
A880	Second most important		
	1 = Building literature skills (reading, math, writing, speaking)	1409	381
	2 = Encouraging academic excellence	2050	683
	3 = Promoting occupational/vocational skills	703	41
	4 = Promoting good work habits and self-discipline	2313	389
	5 = Promoting personal growth (self-esteem, self-knowledge, etc.)	1644	446
	6 = Promoting human relations skills	622	92
	7 = Promoting specific moral values	165	386
	8 = Promoting multicultural awareness or understanding	192	325

		Unweighted Frequencies	
Source Code or Variable Name	**Description**	**Public**	**Private**
A885	Third most important		
	1 = Building literature skills (reading, math, writing, speaking)	725	256
	2 = Encouraging academic excellence	1071	502
	3 = Promoting occupational/vocational skills	1013	97

STATABB	Two character State abbreviation		

NOTE: The majority of the SASS ECB variables are numeric. STATABB is alphanumeric and requires a small change to the generated SAS and SPSS code to output correctly.

SAS code changes required:

A dollar sign is required on the INPUT statement for alphanumeric variables. Example - INPUT STATABB $ 637-638;

In SPSS code:

The letter A in parentheses is required on the DATA LIST statement for alphanumeric variables. Examples below.

In DOS: DATA LIST FILE='DISTRICT' /STATABB 637-638(A).
In WINDOWS: DATA LIST='DISTRICT' /STATABB 637-638(An).

Description	Public	Private

DCTYNM	County name	9098	–
STRATM	94 SASS Public school stratum code. The different parts of the STRATM must be identified to correctly utilize the information in this code. 'Pcnt' is the 'total' Public Principals (9098).		
	Char 1 1=Native American Schools	415	–
	2=Bureau of Indian Affairs(BIA) Schools	13	–
	3=Delaware,Nevada, and West Virginia Schls	349	–
	4=All Other Schools	8321	–
	Chars 2-3: FIPS State Code (See State)		
	Chars 4-5: ALL=00		
	Char 6: Recoded graded level		
	1=Elementary	4175	–
	2=Secondary	3796	–
	3=Combined	1127	–

To evaluate the multiple parts of STRATM, use the sample code below as a tool.
To select the 'Recode Grade Level' (Character 6) and create a new variable called 'RECGRADE'
in SAS: `Recgrade=substr(STRATM,6,1);`

In the SAS code: STRATM identifies the substring variable
The '6' is the starting position of the selected variable part.
The '1' is the length of the variable part you want to substring
There is NO substring option documented in SPSS.

APPENDIX J. PUBLIC AND PRIVATE SCHOOL TEACHER (SASS 4A AND 4B) CODEBOOK

This codebook represents the School and Staffing Survey Teacher Questionnaire for both public and private teachers. In this codebook, data represented by "--" means "not applicable" to the question for a particular variable to one of the surveys, either the Public Teacher questionnaire or the Private Teacher questionnaire.

			Unweighted Frequencies	
Source Code or Variable Name	**Description**		**Public**	**Private**
SURVEY	**Survey identifier**			
	4 = Public school teacher		47105	--
	8 = Private school teacher		--	8372
CNTLNUM	**Teacher Control Number**			
	char 1-2	**FIPS State Code (see REGION or STATE)**		
	char 3	**School ID**		
		1 = Public Schools	47035	0
		3 = Bureau of Indian Affairs Schools (BIA)	70	0
		4 = Catholic Schools	0	3000
		5 = OTHER Private Schools	0	5128
		6 = Area Search Frame Schools	0	244
		7 = LEA with no schools	0	0
		8 = School split (extra record)	0	0
		9 = School split into 3 (second extra record)	0	0
	Char 4	**Split Indicator**		
		0 = School is original school or is not split		
		1 = School is the product of a two way or a three way split		
		2 = School is the product of a three way split		
		9 = School is part of a merger		
	char 5-7	**LEA Number**		
		Census assigned, simple sequential assignment for Public.		
		For Private schools it is identical to School Number.		
	char 8-10	**School Number**		
		Assigned within LEA for public schools		
		Assigned within State for private schools		
		Range for Overlap Schools 001-499		
		Range for Non Overlap Schools 501-999		
	char 11-13	**Teacher Number**		
		Assigned sequentially within school starting with 001		
	char 14	**Check Digit**		

1993–94 SCHOOLS AND STAFFING SURVEY
SCHOOL TEACHER QUESTIONNAIRE
CODEBOOK (RESTRICTED USE)
QUESTIONNAIRE IDENTIFICATION

Source Code or Variable Name	Description	Unweighted Frequencies Public	Private
LEACNTL	LEA control number used for merging purposes. Use this variable when merging LEA with Public School, Administrator, and/or Teacher files. For example, if you wanted to merge the LEA data with the Public TEACHER data.	47105	--

```
In SAS, add these lines of code after the 'DATA' step:
Data MERGED;
Merge 'TEACHER' (in=A) 'LEA';
If A;
By LEACNTL;
Run;
In SPSS, add these lines of code after the 'DATA LIST' step:
DOS: Join match files /file='TEACHER'  (Use if in SPSS-DOS)
          /file='LEA'
          /by LEACNTL.
WINDOWS: Match files /file='TEACHER'  (Use if in SPSS-WINDOWS)
          /file='LEA'
          /by LEACNTL;
```

Source Code or Variable Name	Description	Unweighted Frequencies Public	Private
SCHCNTL	School control number used for merging purposes. Use this variable when merging TEACHER with School and/or Administrator files. For example, if you wanted to merge the SCHOOL data with the TEACHER data.	47105	8372

```
In SAS, add these lines of code after the 'DATA' step:
Data MERGED;
Merge 'TEACHER' (in=A) 'SCHOOL';
If A;
By SCHCNTL;
Run;
In SPSS, add these lines of code after the 'DATA LIST' step:
DOS: Join match files /file='TEACHER'  (Use if in SPSS-DOS)
          /file='SCHOOL'
          /by SCHCNTL.
WINDOWS: Match files /file='TEACHER'  (Use if in SPSS-WINDOWS)
          /file='SCHOOL'
          /by SCHCNTL.
```

STATE	FIPS State Code for the physical location of the Teacher's school. FIPS stands for Federal Information Processing Standards and refers to a variety of codes for standardized reference. FIPS county and state codes are codes developed by the National Institute for Standards and Technology (NIST) as numeric identifiers for each county and state in the United States; state codes are listed in the codebook, while the county codes may be looked up in NIST publications. Copies of FIPS publications are available for sale by the National Technical Information Service (NTIS), U.S. Department of Commerce, Springfield, VA. (703) 487-4650

TCHWGT	Teacher Final Weight. The TCHWGT is used in all analysis in order to make population estimates from the data. It is based on the inverse of the probability of selection, adjusted for nonresponse, for schools not providing a teacher list, and for differences between the sample estimates and known universe totals. In SAS, this weight is used in a frequency: Weight TCHWGT; In SPSS, this weight is used in a frequency: Weight by TCHWGT.		
	Minimum Value	0.85	0.89
	Maximum Value	703.23	635.60
	Mean	54.3741	45.1941
	Standard Deviation	71.8079	39.5345
REPWGT1- REPWGT48	Replicate weight for bootstrap variance estimation. These weights may be input into variance estimation software which uses the balanced repeated replication method. Rounded to 4 significant decimal places. Maximum number of digits is 8, including the decimal point.	47105	8372

	Note: The following questions request information on classes you taught at THIS school during your most recent full week of teaching (i.e., the last week when school was in session for 5 full days and you taught your normal schedule).		
T0790	37. Which of these categories best describes the way your classes at this school are organized? *Mark one only.*		
	1 = DEPARTMENTALIZED INSTRUCTION - You teach subject matter courses (e.g., biology, history, typing) to several classes of different students all or most of the day. - *skip to item 39*	27896	3689
	2 = ELEMENTARY ENRICHMENT CLASS - You teach only one subject (such as art, music, physical education, computer skills) in an elementary school - *skip to item 41a*	2178	750
	3 = SELF-CONTAINED CLASS - You teach multiple subjects to the same class of students all or most of the day - *go to item 38a*	11740	3355
	4 = TEAM TEACHING - You collaboratae with one or more teachers in teaching multiple subjects to the same class of students - *go to item 38a*	2516	430
	5 = "PULL-OUT CLASS" - You provide instruction (e.g., special education, reading) to certain students who are released from their regular classes - *go to item 38a*	2775	148
T0795	38. a. For SELF-CONTAINED CLASS, TEAM TEACHING, and "PULL-OUT" CLASS teachers: At THIS school, how many students were enrolled in the class or program you taught during your most recent FULL WEEK of teaching? *If you teach two kindergarten or prekindergarten sessions per day, or two or more pull-out classes, report the average number of students.*		
	Minimum Value	1	1
	Maximum Value	250	240
	Mean	27.64	21.95
	Standard Deviation	26.24	15.73
	BLANK = N/A	30074	4439

Source Code or Variable Name	Description	Unweighted Frequencies Public	 Private
	b. **For SELF-CONTAINED CLASS, TEAM TEACHING, and "PULL-OUT" CLASS teachers: During your most recent FULL WEEK of teaching, approximately how many hours did you spend teaching each of these subjects at THIS school?** ***If you taught two or more subjects at the same time, apportion the time to each subject as best you can.*** ***Report hours to the nearest whole hour; do not report fractions or minutes.*** ***If you did not teach a particular subject during the week, mark "None".***		
T0800	(1) English/Reading/Language arts		
	Minimum Value	0	0
	Maximum Value	50	45
	Mean	9.65	7.84
	Standard Deviation	6.99	5.18
	BLANK = N/A	30074	4439
T0805	(2) Arithmetic/Mathematics

	BLANK = N/A	30074	4439

Source Code or Variable Name	Description	Unweighted Frequencies Public	Unweighted Frequencies Private
	NOTE: Answer items 39 and 40 ONLY if you taught subject matter (departmentalized) courses to different groups of students, i.e., you marked #1 for item 37.		
	39.		
T0820	For DEPARTMENTALIZED teachers only: During your most recent FULL WEEK of teaching, how many separate classes (or sections) did you teach AT THIS SCHOOL? Do not include: homeroom periods, study halls, classes taught at any other school. If you teach two or more classes of the same subject (e.g., algebra I) to different groups of students at this school, count them as separate classes. EXAMPLES: (1) If you teach chemistry to two classes of students and physics to two classes of students, you would report 4 classes. (2) If you teach English III to four classes of students and journalism to one class, you would report 5 classes. (3) If you teach drama to one class of students at this school and English IV to three classes of students at another school, you would report 1 class.		
	Minimum Value	1	1
	Maximum Value	25	25
	Mean	5.44	5.44
